PROFILE

Public health professional with a Master of Public Health in Health Equity (Boston University), now completing a Master's in Data Science, Big Data & Business Analytics at Universidad Complutense de Madrid. Five years in US healthcare operations and patient care, and health equity research at Massachusetts General Hospital. Builds dashboards and trackers, analyses qualitative and quantitative data, and plans and evaluates public health programs. A background in international studies and years lived across Venezuela, Lebanon, the US and Spain drive a strong interest in health policy and in using data to show who health systems leave out.

SKILLS

Data & analysis: Python, SQL, MongoDB, SPSS, Excel dashboards & trackers, Tableau, ArcGIS, NVivo, Dedoose, Epic, Git/GitHub, Jupyter

Research: qualitative coding & thematic analysis, quantitative analysis, literature review, participant recruitment & outreach

Public health practice: program planning, logic models, monitoring & evaluation, policy briefs, advocacy campaign planning

Operations & leadership: team coordination, training & onboarding, process improvement, audit & compliance support

PROFESSIONAL EXPERIENCE

Massachusetts General Hospital, Disparities Solutions Center, Boston, MA
Research Assistant March – September 2025

- Coordinated participant recruitment, outreach and scheduling for a research initiative involving Spanish-speaking participants.
- Increased study participation from 2 to 20+ participants through culturally responsive communication and follow-up.
- Managed transcription, data organization and documentation to ensure accuracy, confidentiality and methodological rigor.
- Supported qualitative coding and thematic analysis using NVivo and Dedoose, and contributed to structured reporting for senior leadership.
- Maintained confidential research records, study documentation and project databases, and collaborated with multidisciplinary teams to complete study deliverables.

Atrius Health, Boston, MA
Operational Services Team Lead March 2023 – September 2025

- Coordinated day-to-day operations across a multidisciplinary department of 31 clinicians and staff, ensuring continuity of care and service delivery.
- Built and maintained operational dashboards, performance trackers and reporting tools to monitor departmental performance and support decision-making.
- Analyzed operational data to identify bottlenecks and implemented workflow improvements that increased efficiency.
- Supported audits, compliance reviews and safety reporting through accurate data management and documentation.
- Served as the coordination point between clinical, administrative and management teams; facilitated monthly team meetings and followed through on action items.
- Led onboarding and training for new staff, standardizing procedures and documentation practices.
- Managed weekly inventory planning and procurement across multiple service lines.

Medical Assistant II / Medical Assistant October 2020 – September 2025

- Obtained and documented vital signs and clinical information for 30–40 patients daily in a high-volume outpatient setting, maintaining accurate and confidential electronic medical records.
- Collected specimens and performed point-of-care testing following established clinical protocols.
- Trained newly hired medical assistants on workflows, quality control procedures and documentation standards.

Emmanuel College, Office of Residence Life & Housing, Boston, MA

Assistant Director of Community Standards & Conduct / Residence Director September 2024 – September 2025

Assistant Residence Director / Graduate Assistant September 2023 – September 2024

- Supervised nine Resident Assistants and managed a community of more than 270 students, ensuring compliance and fostering inclusive engagement.
- Created systems to monitor incident trends and track program outcomes, improving responsiveness and transparency.

In-Sight Collaborative, Remote

Facilitator & Wellness Programming Volunteer 2026 – Present

- Facilitated a six-week cohort of the Humanitarian Leadership Program for an international group, covering leadership development, systems thinking, human-centred design and social impact.
- Co-facilitate wellness sessions for humanitarians and activists on burnout (Window of Tolerance) and moral injury.

INTERNSHIPS

Boston Public Health Commission, Boston, MA

Ryan White Dental Program Intern September – December 2019

- Created an Excel-based tracking system for more than 350 authorizations in a federally funded program serving vulnerable populations, and translated program communications from English to Spanish.

Small Planet Institute, Cambridge, MA

Democracy Intern January – May 2020

- Researched and wrote analytical summaries and briefs on democracy and sustainability for public audiences and partner organizations.

The Zovighian Partnership, Beirut, Lebanon

Strategy Analyst Intern May – August 2016

- Conducted qualitative and quantitative research and prepared reports and briefings for consulting and strategy projects.

SELECTED PROJECTS

Data science (github.com/lamajaz/data-science-portfolio): smoking and lung cancer mortality in Spain (Python, interactive dashboard); child mortality in Venezuela with UNICEF data (MongoDB); predicting broken water pumps in Tanzania (scikit-learn, 81.7% accuracy); blood pressure and cholesterol statistics (Excel); data mining on employee salaries (regression, clustering).

Public health: program proposal and M&E plan for a food insecurity initiative for the Winthrop Department of Public Health (team of five); advocacy campaign plan to expand community health centers in Nevada; program brief evaluating medical respite care at Boston Health Care for the Homeless Program.
